7. LENGTH OF OBSERVATION <u>N/A</u>	8. NUMBER OF OBJECTS <u>one</u>	9. COURSE <u>N/A</u>
10. BRIEF SUMMARY OF SIGHTING Mr. ██████████ ██████████, contacted by a ██████████ who gave him a specimen of an obj that came out of the sky with a roar and fell sizzling into a nearby creek. He broke off a small fragment within 15 minutes. Told Mr. ██████████ it was a meteor & the govt would analyze it, and contact him for the rest of the meteorite which was about 50 lb in weight.		11. COMMENTS Analysis showed object iron pyrite crystals. Residual limarite indicates it was in the water or for some time. It never fell out of the sky. No scorching, burning or galling. Crystals are sharp & square. Aerodynamic heating & melting would have rounded these off. Verbal rpt given to Mr. ██████████ Stat Services Division. Specimen in Specimen files.  See? Specimen 7-3745-427

Summary - UFO Report - Object from Sky

A Mr. [REDACTED] from Stat. Service Division,  
AMC contacted Sgt. Tolson, NCIC, UFO  
Group. Stated he was contacted by a Mr.

[REDACTED] who gave him a specimen of  
a flying object that fell zig-zagging out of  
the sky into a creek nearly his home. Requested  
that the government should examine it,  
and that he be contacted for the rest of  
the meteorite (as he called it) which weighed  
about 50 lbs.

According to [REDACTED] he broke a fragment off  
within 15 minutes after it hit the water.

Examination shows object to be iron  
oxite-crystallized fragments. Must have been in the  
water for some <sup>lengthy</sup> period. It did not fall  
from the sky, <sup>as a meteorite</sup> as the aerodynamic heating /  
melting and spalling zones have scorched and  
rounded off the falling object. The crystals were  
sharp and square. Verbal report given to Mr. [REDACTED] with  
comment that [REDACTED] credibility is unreliable.  
Fragrant - Specimen drawer Under Case  
file date.

Capt. G. T. Dealey
